

Tend to Your Tributaries September 25, 2010

Seeking all citizens!
Join SOLV volunteers from 10 A.M. to 1 P.M. in an effort to improve water quality and ecosystems around SW Washington. We all utilize these natural resources for drinking, agriculture, recreation and more; so why not help SOLV issues upstream before they drift to sea? Local actions, tackling global problems.

The Salmon Creek Watershed Council, Vancouver Watersheds Council and Vancouver-Clark Parks & Recreation are outfitting* four projects where residents can work on our waterways. To sign up, contact any of these organizations or visit www.SOLV.org.

* No equipment needed in most cases. Details can be obtained from specific organizations.

Salmon Creek Watershed Council
Clark County, Washington
